## Education

---

**University of California, Berkeley**

*Aug 2017 – May 2021, Berkeley, CA*

**B.A. Cognitive Science**

## Skills

---

**Frameworks:** Vue.js/Nuxt.js, Tailwind CSS, React, Angular, Vite, Material UI

**AI Tools & Testing:** Claude Code, Cursor, GitHub Copilot, Vitest, React Testing Library, pytest

**Languages:** TypeScript, JavaScript, Python, GraphQL, HTML/CSS, C#/.NET

**Backend, Data & DevOps:** PostgreSQL, RESTful APIs, GraphQL, OAuth2/JWT, Git, GitHub, CircleCI

## Work Experience

---

**Moody's**

*Aug 2021 – May 2025, San Francisco, CA*

**Software Engineer**

*Aug 2023 – May 2025*

- Architected and deployed scalable, responsive client-facing interfaces using React and Angular, integrating RESTful APIs with secure OAuth2/JWT authentication to streamline data flow across devices
- Resolved UI issues with high urgency by partnering with QA engineers to proactively monitor application performance and iterate across a variety of user scenarios
- Refactored large-scale applications into maintainable micro-frontend modules using GitHub and CircleCI, improving code reusability and long-term scalability

**Associate Software Engineer, Rotational Program**

*Aug 2021 – Jul 2023*

- Developed C#/.NET APIs with PostgreSQL and GraphQL, enabling users to input and persist custom coefficients for real-time financial model calculations
- Implemented pixel-perfect Figma designs using Angular and React, liaising with UX designers to ensure 100% adherence to accessibility standards and mock-ups

**Marqui Labs**

*Jun 2020 – Jul 2021, Mountain View, CA*

**Front-End Developer Intern**

- Delivered high-fidelity proofs of concept for NASA and SynBioBeta using Nuxt.js/Vue.js, replacing an outdated application with a modern, responsive user experience
- Owned end-to-end delivery of a website independently, from building content architecture in a headless CMS to integrating endpoints into a custom UI
- Overhauled outdated web designs with new logos, animations, and branding assets for clients, changing the feel of the company's online presence

## Technical Projects

---

**Campus Mentor Dashboard • International Student Mentorship Program**

*Jul 2026 – Present, Remote*

- Engineered a full-stack reference dashboard (React, TypeScript, Vite frontend; FastAPI, PostgreSQL backend) surfacing academic calendar, demographics, and student-needs data to prep incoming mentees
- Wrote an 18-case automated test suite (Vitest, React Testing Library, pytest) covering component rendering, data validation, and API endpoints, with Zod schemas syncing frontend/backend contracts
