

Jeanine Tso Lin

San Francisco Bay Area • 510.676.6450 • jtso3388@berkeley.edu
Portfolio: jeaninetso.github.io • LinkedIn: linkedin.com/in/jeanine-tso

Education

University of California, Berkeley

Aug 2017 – May 2021, Berkeley, CA

B.A. Cognitive Science

Skills

Languages: JavaScript, TypeScript, HTML/CSS, GraphQL, Python, C#/.NET

Frameworks: React, Angular, Vue.js/Nuxt.js, Vite, Tailwind CSS, Material UI

Data & APIs: RESTful APIs, GraphQL, OAuth2/JWT, PostgreSQL

Tools & Testing: Git, GitHub, CircleCI, Vitest, React Testing Library, pytest, Claude Code, Cursor, GitHub Copilot

Work Experience

Moody's

Aug 2021 – May 2025, San Francisco, CA

Software Engineer

Aug 2023 – May 2025

- Architected and deployed scalable, responsive client-facing interfaces using React and Angular, integrating RESTful APIs with secure OAuth2/JWT authentication to streamline data flow across devices
- Collaborated with UI/UX designers to translate Figma wireframes into reusable, accessible components, maintaining 100% adherence to established design systems across multiple breakpoints
- Refactored large-scale applications into maintainable micro-frontend modules using GitHub and CircleCI, improving code reusability and long-term scalability
- Monitored application performance by collaborating with QA engineers to proactively identify and resolve UI issues and iterating to accommodate a variety of user scenarios

Associate Software Engineer, Rotational Program

Aug 2021 – Jul 2023

- Implemented pixel-perfect Figma designs using Angular and React, liaising with UX designers to ensure 100% adherence to accessibility standards and mock-ups
- Developed C#/.NET APIs with PostgreSQL and GraphQL, enabling users to input and persist custom coefficients for real-time financial model calculations

Marqui Labs

Jun 2020 – Jul 2021, Mountain View, CA

Front-End Developer Intern

- Delivered high-fidelity proofs of concept for NASA and SynBioBeta using Nuxt.js/Vue.js to replace an outdated application with a modern, responsive user experience
- Owned end-to-end delivery of a website, from building content architecture in a headless CMS to integrating endpoints into a custom UI

Technical Projects

Campus Mentor Dashboard • International Student Mentorship Program

Jul 2026 – Present, Remote

- Built a full-stack reference dashboard (React, TypeScript, Vite frontend; FastAPI, PostgreSQL backend) surfacing academic calendar, demographics, and student-needs data to prep incoming international student mentees
- Wrote an 18-case automated test suite (Vitest, React Testing Library, pytest) spanning component rendering, data validation, and API endpoints, with Zod schemas keeping frontend/backend data contracts in sync
